(Some names\* are uncertain or believed not to be Indigenous women; rather they are listed to reflect that issues such as vulnerability, domestic violence, and mental illness impact all MMW.)

That leaves over 150 MMIWG from Alberta to be counted or to have their heritage confirmed.

Another 17 names were not numbered because they are from outside of Alberta.

It appears obvious that Indigenous heritage is a significant factor of risk and vulnerability.

At least 36 of the 175 women (20%) have never been found.

There is no analysis of offenders. In over 100 of the cases, no charges were laid.
